

# Hamerton Zoo Park

Dear Teacher,

We're excited to invite you and your students to Hamerton Zoo Park for an unforgettable educational experience in 2024/25!

Nestled in the Cambridgeshire countryside, Hamerton Zoo is home to over 120 animal species — from majestic big cats to Australia's finest wildlife. Alongside our animal collection, students can travel back in time to meet life-sized, roaring animatronic dinosaurs on our *K-T Express* prehistoric adventure!

## Educational Workshops Tailored to the National Curriculum

Our Education Department offers a wide range of interactive 30-minute workshops, delivered in our dedicated Explorers Cabin. Each workshop is **adapted to suit your students' Key Stage and learning objectives**:

- **Night and Day** — Learn about nocturnal, diurnal, and crepuscular animals and their special adaptations.
- **Variety of Life** — Explore evolution's role in animal diversity, from skeletons to genetics.
- **Fur, Feathers and Scales** — Discover the features that separate mammals, birds, and reptiles.
- **Animal Senses** — Investigate how animals use their senses to survive and thrive.

- **Adaptation to Habitat** — Explore how animals evolve to suit different environments, focusing on desert species.
- **Camouflage** — Understand how and why animals blend into their surroundings.
- **Behaviour and Training** — Ideal for older students, discussing innate vs. learned behaviours and animal training methods.

Can't see a perfect fit? Our Educational Officer is happy to create a bespoke workshop tailored to your curriculum needs — **at no extra charge**. (Please note: bespoke workshops require 2 weeks' notice and materials remain property of Hamerton Zoo Park.)
